# INDEX TO VOLUME XIX

Advances in the study of streptococci ..... 57
Aeration, An, train for the study of gases produced in bacterial growth. Abstract ..... 6
Allen, O. N., and Baldwin, I. L. A method for isolating cultures of *Rhizobium spp.* directly from the soil. Abstract ..... 38
Allgeier, R. J., and Peterson, W. H. Bacterial production of the isomers of lactic acid and their identification. Abstract ..... 18
Allyn, W. P., and Baldwin, I. L. The effect of oxidizing and reducing agents on the growth of *Rhizobium spp.* in culture media. Abstract ..... 9
Ammonia, methylamine and glycine, Germicidal efficiency of chlorine and the N-chloro derivatives of, against anthrax spores ..... 295
—— production, The detection of, by bacteria in agar slants ..... 223
Anaerobes, A simple method of growing, in Petri dish cultures ..... 101
——, Growth of, in crystal violet bile media ..... 117
Anaerobic bacteria in dairy products. I. Numbers of spores of anaerobic bacteria in milk and cream ..... 89
—— —— —— —— ——. II. Relationship of anaerobic bacteria to certain abnormal fermentations ..... 95
Anderson, D. Q., and Levine, Max. Some characteristics of bacteria causing mustiness in eggs. Abstract ..... 44
Anthrax spores, Germicidal efficiency of chlorine and the N-chloro derivatives of ammonia, methylamine and glycine against ..... 295
Antibody production in allergic rabbits. Abstract ..... 30
Antigenic studies of the precipitation test for syphilis. Abstract ..... 34
——, The, properties of the ultramicroscopic viruses. Abstract ..... 20
Apparatus, An, for increasing the amount of inoculum without diluting the medium. Abstract ..... 7
Assimilation, The, of nitrates by soil microorganisms. Abstract ..... 43
Autolysis in sterile tissues, The effect of, on subsequent bacterial decomposition ..... 73
Azotobacter and cellulose decomposing organisms, An explanation of the action of the so-called accessory substances in the association of ..... 149
——, The influence of fixed nitrogen on ..... 389

*Bacillus subtilis*, The cell structure and cell division of ..... 113
Bacteria, Anaerobic, in dairy products. I. Numbers of spores of anaerobic bacteria in milk and cream ..... 89
—— in agar slants, The detection of ammonia production by ..... 223
——, marine, Certain relationships of, to the decomposition of fish ..... 375
——, On certain factors influencing the survival of, in water and in saline solutions ..... 303

Bacterial cultures, A new vessel for the efficient aeration of, in liquid media... 415
—— ——, The intermittent growth of ..... 181
—— decomposition, The effect of autolysis in sterile tissues on subsequent... 73
—— population, Studies of, during sludge digestion ..... 269
—— production of the isomers of lactic acid and their identification. Abstract ..... 18
——, The flora of aseptically drawn milk. Abstract ..... 44
——, The, proteolytic enzymes: Their activity at different pH values and the effect of sodium chloride. Abstract ..... 12
Bacteriological findings in 186 human autopsies with special reference to the anaerobic bacilli. Abstract ..... 28
—— media, A study of methods for the estimating of reducing sugar in.... 125
Bacteriolytic principle, The isolation of a, from the root nodules of red clover. 191
Bacteriophage, Filtration of ..... 213
Bacteriostasis, dye, Compound formation of crystal violet with nucleic acid and gelatin and its significance in ..... 133
Bacteriostatic, The, effect of gentian violet on thermophilic spore-forming bacteria. Abstract ..... 52
Baldwin, I. L., and Allen, O. N. A method for isolating cultures of *Rhizobium spp.* directly from the soil. Abstract ..... 38
—— and Allyn, W. P. The effect of oxidizing and reducing agents on the growth of *Rhizobium spp.* in culture media. Abstract ..... 9
——, Dittmar, H. R. and Miller, S. B. The influence of certain inorganic salts on the germicidal activity of hydrogen peroxide ..... 203
—— and Dunham, D. H. The effect of nitrate fertilization upon the relationship between the host plant and various strains of *Rhizobium spp.* Abstract ..... 42
Ballantyne, E. N. On certain factors influencing the survival of bacteria in water and in saline solutions ..... 303
Batchelor, Harold W., and Curie, Irvin H. A method for determining the number of Azotobacter colonies in soil. Abstract ..... 40
—— and ——. Recurrent periodism of nitrogen fixation and denitrification in incubated soils. Abstract ..... 42
Beach, B. A., Hastings, E. G., and Thompson, Isabel. The sensitization of cattle to tuberculin by non-tubercle, acid-fast bacilli of bovine origin. Abstract ..... 29
Behrens, C. A. Antibody production in allergic rabbits. Abstract ..... 30
Bergey, D. H. Designation of the relation of bacteria to free oxygen. Abstract ..... 4
Boak, R. A., and Carpenter, C. M. The effect of heat produced by an ultra-high frequency oscillator on experimental syphilis in rabbits. Abstract. 24
—— and ——. The examination of samples of porcine blood for *Brucella abortus* agglutinins. Abstract ..... 33
Breden, C. R., Fulmer, E. I., Werkman, C. H., and Hixon, R. M. The chemical action of *Aerobacter faeni* on xylose and on sucrose. Abstract..... 41
Broadhurst, Jean, and Lehr, Beulah E. A retention test for inhalants and similar preparations. Abstract ..... 38
—— and Pease, Dorothy. A preliminary report of a spiral pleomorphic organism. Abstract ..... 24

Bronfenbrenner, J. Studies on the nature of bacteriophage. Abstract.... 19
Broom, Norma H., and Norton, John F. Some agglutination studies with meningococci. Abstract..... 32
Brown, P. E., and Smith, F. B. Phosphate assimilation by certain soil molds. Abstract..... 43
—— and —— The assimilation of nitrates by soil microorganisms. Abstract..... 43
—— and Walker, R. H. Some fermentation characteristics of various strains of *Rhizobium meliloti* and *Rhizobium japonicum*. Abstract..... 41
Brunstetter, B. C., and Magoon, C. A. A new vessel for the efficient aeration of bacterial cultures in liquid media..... 415
Buchholz, John T., and Lewis, I. M. A method for preparing photographs of Petri dish cultures by direct contact printing on photographic paper... 105
Burk, Dean, and Lineweaver, Hans. The influence of fixed nitrogen on Azotobacter..... 389
Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L., and Conn, H. J. Report of the committee on bacteriological technic: New undertakings during the year 1929..... 2
Burkey, L. A., and Frazier, W. C. The influence of certain milk bacteria on Swiss cheese. Abstract..... 49
——, Matheson, K. J., Watson, P. D., and Frazier, W. C. The use of certain streptococci as starters for Swiss cheese. Abstract..... 50

Cameron, E. J. The bacteriostatic effect of gentian violet on thermophilic spore-forming bacteria. Abstract..... 52
Carbon metabolism, The relationship between the nitrogen and, of *Clostridium acetobutylicum*..... 231
Carpenter, C. M., and Boak, R. A. The effect of heat produced by an ultra-high frequency oscillator on experimental syphilis in rabbits. Abstract. 24
—— and ——. The examination of samples of porcine blood for *Brucella abortus* agglutinins. Abstract..... 33
Case, A, of local microbiological activity in soil. Abstract..... 43
Casman, E. P., and Valley, George. On the serological diagnosis of pullorum disease in domestic fowls: The chemical nature and the mechanism of the "cloudy" reaction. Abstract..... 36
Cell, The, structure and cell division of *Bacillus subtilis*..... 113
Cellulose decomposing organisms, An explanation of the action of the so-called accessory substances in the association of Azotobacter and..... 149
—— decomposition by anaerobic bacteria. Abstract..... 15
Certain relationships of marine bacteria to the decomposition of fish..... 375
Chapin, Robert M., and Tilley, Frank W. Germicidal efficiency of chlorine and the N-chloro derivatives of ammonia, methylamine and glycine against anthrax spores..... 295
Characteristics, Some, of bacteria causing mustiness in eggs. Abstract..... 55
Chemical, The, action of *Aerobacter faeni* on xylose and on sucrose. Abstract. 41
——, The, nature and the mechanisms of the "cloudy" reaction. On the serological diagnosis of pullorum disease in domestic fowls: Abstract..... 36
Chlorine and the N-chloro derivatives of ammonia, methylamine and glycine, germicidal efficiency of, against anthrax spores..... 295

Clark, Paul F., and Schindler, John A. The concentration of the virus of epidemic poliomyelitis. Abstract ..... 20
*Clostridium acetobutylicum*, The relationship between the nitrogen and carbon metabolism of ..... 231
Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L., Conn, H. J., and Burke, Victor. Report of the committee on bacteriological technic: New undertakings during the year 1929 ..... 2
Coleman, Marion B., Owen, Helen H., and Dacey, H. Gladys. Fermentation of monosaccharids by organisms of the abortus-melitensis group. Abstract ..... 34
Colon-aerogenes group, A sugar-tolerant member of the ..... 145
Comparative, A, study of the effect of cations on bacterial viability. Abstract ..... 8
Compound formation of crystal violet with nucleic acid and gelatin and its significance in dye bacteriostasis ..... 133
Concentration, The, of the virus of epidemic poliomyelitis. Abstract ..... 20
Conductivity, A, method for the analysis of mixtures of the volatile acids. Abstract ..... 5
Conn, H. J., Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., Hall, Ivan C., and Kulp, W. L. Report of the committee on bacteriological technic: New undertakings during the year 1929 ..... 2
Contribution, A, to the bacteriology of grass silage. Abstract ..... 54
Control, The, of thermophilic bacteria in pasteurizing plants. Abstract ..... 46
Corbet, Alexander Steven. Description of an organism found in the latex of *Hevea brasiliensis* ..... 321
Cowles, Philip B. Cellulose decomposition by anaerobic bacteria. Abstract. 15
Cox, Warren M., Jr., Prickett, Paul S., and Massengale, O. N. Preliminary report on the ergosterol content of and the effect of ergosterol (activated and unactivated) on growth of *Mycobacterium tuberculosis*. Abstract ..... 8
Crystal violet bile media, Growth of anaerobes in ..... 117
Crystal violet, Compound formation of, with nucleic acid and gelatin and its significance in dye bacteriostasis ..... 133
Culture media containing sugars, The inhibition of *Phytomonas malvacearum* in ..... 423
Curie, Irvin H., and Batchelor, Harold W. A method for determining the number of Azotobacter colonies in soil. Abstract ..... 40
—— and ——. Recurrent periodism of nitrogen fixation and denitrification in incubated soils. Abstract ..... 42
Cytological and bacteriological investigations of bean mosaic. Abstract ..... 22

Dacey, H. Gladys, Coleman, Marion B., and Owen, Helen H. Fermentation of monosaccharids by organisms of the abortus-melitensis group. Abstract ..... 34
Dairy products, Anaerobic bacteria in. I. Numbers of spores of anaerobic bacteria in milk and cream ..... 89
—— ——, —— —— ——. II. Relationship of anaerobic bacteria to certain abnormal fermentations ..... 95

Davis, John S., and Famulener, L. W. Skin reactions following intradermal injections of vaccines prepared from intestinal bacteria. A preliminary report. Abstract ..... 29
Demeter, Karl J. A contribution to the bacteriology of grass silage. Abstract ..... 54
Demonstration of a mold isolated from the hair of children affected with ringworm of the scalp. Abstract ..... 31
Derby, H. A. Observations on butter showing surface taint. Abstract ... 51
Description of an organism found in the latex of *Hevea brasiliensis* ..... 321
Designation of the relation of bacteria to free oxygen. Abstract ..... 4
Detection, The, of ammonia production by bacteria in agar slants ..... 223
Dissociation of acidoproteolytic bacteria by thermobiotic culture. Abstract. 14
Dittmar, H. R., Baldwin, I. L., and Miller, S. B. The influence of certain inorganic salts on the germicidal activity of hydrogen peroxide ..... 203
Dorner, W. The bacterial flora of aseptically drawn milk. Abstract ..... 44
Downs, Cora M., and Gottlieb, Selma. Studies on the precipitin reaction. II. The composition of the precipitate and some factors influencing its formation. Abstract ..... 37
Duggar, B. M. The problem of seed transmission of the typical mosaic of tobacco. Abstract ..... 20
Dunham, D. H., and Baldwin, I. L. The effect of nitrate fertilization upon the relationship between the host plant and various strains of *Rhizobium spp.* Abstract ..... 42
Dye bacteriostasis, Compound formation of crystal violet with nucleic acid and gelatin and its significance in ..... 133

Edwards, G. P., Ruchhoft, C. C., and Kallas, J. G. Studies of bacterial population during sludge digestion ..... 269
Effect of preservatives on agglutinating serum. Abstract ..... 31
——, The, of autolysis in sterile tissues on subsequent bacterial decomposition ..... 73
——, The, of heat produced by an ultra-high frequency oscillator on experimental syphilis in rabbits. Abstract ..... 24
——, The, of nitrate fertilization upon the relationship between the host plant and various strains of *Rhizobium spp.* ..... 42
——, The, of oxidizing and reducing agents on the growth of *Rhizobium spp.* in culture media. Abstract ..... 9
——, The, of salting on the microbial heating of alfalfa hay. Studies in microbial thermogenesis. III. Abstract ..... 53
Evidence of xylanase production by an actinomyces. Abstract ..... 16
Examination, The, of samples of porcine blood for *Brucella abortus* agglutinins. Abstract ..... 33
Explanation, An, of the action of the so-called accessory substances in the association of Azotobacter and cellulose decomposing organisms ..... 149

Falk, I. S., and Pittman, Margaret. Studies on respiratory diseases. Some relations between extracts, filtrates and virulence of pneumococci ..... 327

Famulener, L. W., and Davis, John S. Skin reactions following intradermal injections of vaccines prepared from intestinal bacteria. A preliminary report. Abstract ..... 29
Fermentation of monosaccharids by organisms of the abortus-melitensis group. Abstract ..... 34
—— of pentoses by certain propionic acid bacteria. Abstract ..... 17
Fermentations, Abnormal, Relationship of anaerobic bacteria to certain. Anaerobic bacteria in dairy products. II ..... 95
Fermenting capacity of the single cell, The formula of the ..... 383
Filtration of bacteriophage ..... 213
Fish, certain relationships of marine bacteria to the decomposition of ..... 375
Foote, Marion, Peterson, W. H., and Fred, E. B. Fermentation of pentoses by certain propionic acid bacteria. Abstract ..... 17
Formula, The, for the fermenting capacity of the single cell ..... 383
Foster, R. L., Moore, E. E., and Fulmer, E. I. A conductivity method for the analysis of mixtures of the volatile acids. Abstract ..... 5
Frazier, W. C., and Burkey, L. A. The influence of certain milk bacteria on Swiss cheese. Abstract ..... 49
——, ——, Matheson, K. J., and Watson, P. D. The use of certain streptococci as starters for Swiss cheese. Abstract ..... 50
Fred, E. B., Foote, Marion, and Peterson, W. H. Fermentation of pentoses by certain priopionic acid bacteria. Abstract ..... 17
—— and Keipper, C. H. The microorganisms of cabbage and their relation to sauerkraut production. Abstract ..... 53
—— and Wilson, P. W. The relationship between the carbon and nitrogen metabolism of the butyl alcohol forming organism. Abstract ..... 17
——, ——, and Peterson, W. H. The relationship between the nitrogen and carbon metabolism of *Clostridium acetobutylicum* ..... 231
Fulmer, E. I., Breden, C. R., Werkman, C. H., and Hixon, R. M. The chemical action of *Aerobacter faeni* on xylose and on sucrose. Abstract ..... 41
——, Foster, R. L., and Moore, E. E. A conductivity method for the analysis of mixtures of the volatile acids. Abstract ..... 5
Further studies on canine anaphylaxis. Abstract ..... 28

Gardner, Clara G., and Skinner, C. E. The utilization of nitrogenous organic compounds and sodium salts of organic acids by certain soil algae in darkness and in the light ..... 161
Gee, Haldane. Special methods in marine bacteriology and preliminary surveys of Pacific waters. Abstract ..... 11
Genung, Elizabeth F., Hall, Ivan C., Kulp, W. L., Conn, H. J., Burke, Victor, and Cohen, Barnett. Report of the committee on bacteriological technic: New undertakings during the year 1929 ..... 2
Germicidal efficiency of chlorine and the N-chloro derivatives of ammonia, methylamine and glycine against anthrax spores ..... 295
Gibbons, Norman E., and Reed, Guilford B. The effect of autolysis in sterile tissues on subsequent bacterial decomposition ..... 73
Gorini, Costatino. Dissociation of acidoproteolytic bacteria by thermobiotic culture. Abstract ..... 14

Gorseline, H. E., and Levine, Max. Notes on monilia-like organisms from a trickling filter receiving creamery wastes. Abstract ..... 51
Gottlieb, Selma and Downs, Cora M. Studies on the precipitin reaction. II. The composition of the precipitate and some factors influencing its formation. Abstract ..... 37
Greenbank, G. R., and Rogers, L. A. The intermittent growth of bacterial cultures ..... 181
Growth of anaerobes in crystal violet bile media ..... 117
——, The, of bacteria in a continuous flow of broth. Abstract ..... 7
——, The, of thermophilic cellulose decomposing organisms on agar. Abstract ..... 15

Hall, Ivan C. Bacteriological findings in 186 human autopsies with special reference to the anaerobic bacilli. Abstract ..... 28
——, Kulp, W. L., Conn, H. J., Burke, Victor, Cohen, Barnett, and Genung, Elizabeth F. Report of the committee on bacteriological technic: New undertakings during the year 1929 ..... 2
Hammer, B. W., and Harriman, L. A. Variations in *Streptococcus lactis*. Abstract ..... 48
—— and Hussong, R. V. Anaerobic bacteria in dairy products. I. Numbers of spores of anaerobic bacteria in milk and cream ..... 89
—— and ——. Anaerobic bacteria in dairy products. II. Relationship of anaerobic bacteria to certain abnormal fermentations ..... 95
—— and —— Lactic acid producion of some of the anaerobes. Abstract.. 52
Hansen, P. Arne. An investigation of thermophiles in freshly drawn milk. Abstract ..... 46
——. The detection of ammonia production by bacteria in agar slants ..... 223
Harriman, L. A., and Hammer, B. W. Variations in *Streptococcus lactis*. Abstract ..... 48
Hastings, E. G., Beach, B. A., and Thompson, Isabel. The sensitization of cattle to tuberculin by non-tubercle, acid-fast bacilli of bovine origin. Abstract ..... 29
Haywood, Eloise T., and Winslow, C.-E. A. A comparative study of the effect of cations on bacterial viability. Abstract ..... 8
Hektoen, Ludvig. Advances in the study of streptococci ..... 57
Herrington, B. L., and Knaysi, Georges. A simple method of growing anaerobes in Petri dish cultures ..... 101
*Hevea brasiliensis*, Description of an organism found in the latex of ..... 321
Hitchner, E. R. The isolation of a bacteriolytic principle from the root nodules of red clover ..... 191
Hixon, R. M., Breden, C. R., Fulmer, E. I., and Werkman, C. H. The chemical action of *Aerobacter faeni* on xylose and on sucrose. Abstract ..... 41
——, Patrick, Roger, and Werkman, C. H. Evidence of xylanase production by an actinomyces. Abstract ..... 16
——, Rayburn, C. H., and Werkman, C. H. An apparatus for increasing the amount of inoculum without diluting the medium. Abstract ..... 7
Hoggan, Isme A. Studies on aphid transmission of plant viruses. Abstract. 21

Holst, E. G., Wright, William H., and Sarles, W. B. A study of *Rhizobium japonicum* isolated from various soils. Abstract ..... 39
Hopkins, E. W., and Peterson, W. H. The nature of the fat-like constituents of the alfalfa root nodule bacteria. Abstract ..... 9
Humfeld, Harry, and Smith, Nathan R. A case of local microbiological activity in soil. Abstract ..... 43
Hussong, R. V., and Hammer, B. W. Anaerobic bacteria in dairy products. I. Numbers of spores of anaerobic bacteria in milk and cream ..... 89
—— and ——. —— —— —— —— ——. II. Relationship of anaerobic bacteria to certain abnormal fermentations ..... 95
—— and ——. Lactic acid production of some of the anaerobes. Abstract. 52
Hydrogen peroxide, The influence of certain inorganic salts on the germicidal activity of ..... 203

Influence, The, of certain inorganic salts on the germicidal activity of hydrogen peroxide ..... 203
——, The, of certain milk bacteria on Swiss cheese. Abstract ..... 49
——, The, of fixed nitrogen on Azotobacter ..... 389
Inhibition, The, of *Phytomonas malvacearum* in culture media containing sugars ..... 423
Inoculation malaria; sexual and asexual strains. Abstract ..... 25
Intermittent, The, growth of bacterial cultures ..... 181
Investigation, An, of thermophiles in freshly drawn milk ..... 46
Isolation, The, and some of the characteristics of a single cell culture of nitrosomonas. Abstract ..... 10
——, The, of a bacteriolytic principle from the root nodules of red clover ..... 191

James, Lawrence H. A sugar-tolerant member of the colon-aerogenes group. 145
James, L. H., and Stuart, L. S. Studies in microbial thermogenesis. III. The effect of salting on the microbial heating of alfalfa hay. Abstract ..... 53
—— and Swenson, T. L. A study of pin-spot molding on shell eggs in cold storage. Abstract ..... 55

Kahn, R. L., Malloy, A. M., and Westall, Lucy. Precipitation studies with spinal fluid. Abstract ..... 35
Kallas, J. G., Ruehhoft, C. C., and Edwards, G. P. Studies of bacterial population during sludge digestion ..... 269
Keipper, C. H., and Fred, E. B. The microörganisms of cabbage and their relation to sauerkraut production. Abstract ..... 53
Kendall, Sara E., and Werkman, C. H. Physiology and classification of the propionic acid bacteria. Abstract ..... 17
Knaysi, Georges. The cell structure and cell division of *Bacillus subtilis* ..... 113
—— and Herrington, B. L. A simple method of growing anaerobes in Petri-dish cultures ..... 101
Kopeloff, Nicholas. Inoculation malaria; sexual and asexual strains. Abstract ..... 25
Kulp, W. L., Conn, H. J., Burke, Victor, Cohen, Barnett, Genung, Elizabeth F., and Hall, Ivan C. Report of the committee on bacteriological technic: New undertakings during the year 1929 ..... 2

Lactic acid production of some of the anaerobes. Abstract ..... 52
Larkum, Newton W., and Semmes, Margaret F. Filtration of bacteriophage. 213
Larson, Nora, and Thompson, Luther. Potato extract broth for the typing of *Diplococcus pneumoniae*. Abstract ..... 33
Latex, Description of an organism found in the, of *Hevea brasiliensis* ..... 321
Lehr, Beulah E., and Broadhurst, Jean. A retention test for inhalants and similar preparations. Abstract ..... 38
Levine, Max, and Anderson, D. Q. Some characteristics of bacteria causing mustiness in eggs. Abstract ..... 55
—— and Gorseline, H. E. Notes on monilia-like organisms from a trickling filter receiving creamery wastes. Abstract ..... 51
Lewis, I. M. The inhibition of *Phytomonas malvacearum* in culture media containing sugars ..... 423
—— and Buchholz, John T. A method for preparing photographs of Petri dish cultures by direct contact printing on photographic paper ..... 105
Lineweaver, Hans and Burk, Dean. The influence of fixed nitrogen on Azotobacter ..... 389
Liquid media, A new vessel for the efficient aeration of bacterial cultures in .. 415

Magee, M. Catherine, and Smith, H. Gregg. A study of methods for the estimation of reducing sugar in bacteriological media ..... 125
Magoon, C. A., and Brunstetter, B. C. A new vessel for the efficient aeration of bacterial cultures in liquid media ..... 415
Malloy, A. M., Westall, Lucy, and Kahn, R. L. Precipitation studies with spinal fluid. Abstract ..... 35
Marine bacteria, Certain relationships of, to the decomposition of fish ..... 375
Massengale, O. N., Cox, Warren M., Jr., and Prickett, Paul S. Preliminary report on the ergosterol content of and the effect of ergosterol (activated and unactivated) on growth of *Mycobacterium tuberculosis*. Abstract .. 8
Matheson, K. J., Watson, P. D., Frazier, W. C., and Burkey, L. A. The use of certain streptococci as starters for Swiss cheese. Abstract ..... 50
McCubbin, W. A., and Smith, Floyd F. Spread of mosaic virus in tomato plants. Abstract ..... 23
Method, A, for determining the number of Azotobacter colonies in soil. Abstract ..... 40
——, ——, for isolating cultures of *Rhizobium spp.* directly from the soil. Abstract ..... 38
——, ——, for preparing photographs of Petri dish cultures by direct contact printing on photographic paper ..... 105
Mice, The pathology of pneumococcus infections in. Studies on respiratory diseases ..... 363
Microorganisms, The, of cabbage and their relation to sauerkraut production. Abstract ..... 53
Milk and cream, Numbers of spores of anaerobic bacteria in. Anaerobic bacteria in dairy products. I ..... 89
Miller, S. B., Dittmar, H. R., and Baldwin, I. L. The influence of certain inorganic salts on the germicidal activity of hydrogen peroxide ..... 203

Moore, E. E., Fulmer, E. I., and Foster, R. L. A conductivity method for the analysis of mixtures of the volatile acids. Abstract..... 5
Mudge, C. S., and Thorwaldson, M. L. Studies on thermophiles in milk. Abstract..... 47

Reddish, George F. Phenol coefficient tests by the Hygienic Laboratory and Department of Agriculture methods. Abstract..... 37
Reduction, The, of nitrates to nitrites by *Salmonella pullorum* and *Salmonella gallinarum*..... 261
Reed, Guilford B., and Gibbons, Norman E. The effect of autolysis in sterile tissues on subsequent bacterial decomposition..... 73
Relationship, The, between the carbon and nitrogen metabolism of the butyl alcohol forming organism. Abstract..... 17
——, The, between the nitrogen and carbon metabolism of *Clostridium acetobutylicum*..... 231
Report of the committee on bacteriological technic: New undertakings during the year 1929..... 2
Respiratory diseases, Studies on. Some relations between extracts, filtrates and virulence of pneumococci..... 327
—— ——, —— ——. The pathology of pneumococcus infections in mice.... 363
Retention, A, test for inhalants and similar preparations. Abstract..... 38
Rogers, L. A. The growth of bacteria in a continuous flow of broth. Abstract..... 7
—— and Greenbank, G. R. The intermittent growth of bacterial cultures... 181
Root inoculation with the virus of tobacco mosaic. Abstract..... 23
Rosenow, Edward C. Streptococci in the lesions of experimental poliomyelitis in monkeys. Abstract..... 27
——. Streptococci in the spinal fluid of experimental poliomyelitis in monkeys. Abstract..... 27
Ruehhoft, C. C., Kallas, J. G., and Edwards, G. P. Studies of bacterial population during sludge digestion..... 269

Saline solutions, On certain factors influencing the survival of bacteria in water and in..... 303
*Salmonella gallinarum*. The reduction of nitrates to nitrites by *Salmonella pullorum* and..... 261
*Salmonella pullorum* and *Salmonella gallinarum*. The reduction of nitrates to nitrites by..... 261
Salts, Certain inorganic, The influence of, on the germicidal activity of hydrogen perioxide..... 203
Sanborn, J. R. Certain relationships of marine bacteria to the decomposition of fish..... 375
Sarles, W. B., Wright, William H., and Holst, E. G. A study of *Rhizobium japonicum* isolated from various soils. Abstract..... 39
Schindler, John A., and Clark, Paul F. The concentration of the virus of epidemic poliomyelitis. Abstract..... 20

Schultz, E. W. The antigenic properties of the ultramicroscopic viruses. Abstract ..... 20
Semmes, Margaret F., and Larkum, Newton W. Filtration of bacteriophage. 213
Sensitization, The, of cattle to tuberculin by non-tubercle, acid-fast bacilli of bovine origin. Abstract ..... 29
Sherwood, Noble P., and Stoland, O. O. Further studies on canine anaphylaxis. Abstract ..... 28
Simple, A, method of growing anaerobes in Petri dish cultures ..... 101
Single cell, The formula for the fermenting capacity of ..... 383
Skin reactions following intradermal injections of vaccines prepared from intestinal bacteria. Abstract ..... 29
Skinner, C. E. An explanation of the action of the so-called accessory substances in the association of Azotobacter and cellulose decomposing organisms ..... 149
—— and Gardner, Clara G. The utilization of nitrogenous organic compounds and sodium salts of organic acids by certain soil algae in darkness and in the light ..... 161
Sludge digestion, Studies of bacterial population during ..... 269
Smith, F. B., and Brown, P. E. Phosphate assimilation by certain soil molds. Abstract ..... 43
—— and ——. The assimilation of nitrates by soil microörganisms ..... 43
Smith, Floyd F., and McCubbin, W. A. Spread of mosaic virus in tomato plants. Abstract ..... 23
Smith, H. Gregg, and Magee, M. Catherine. A study of methods for the estimation of reducing sugar in bacteriological media ..... 125
Smith, Nathan R., and Humfeld, Harry. A case of local microbiological activity in soil. Abstract ..... 43
Society of American Bacteriologists, Thirty-first Annual Meeting, Ames, Iowa, December 30, 1929–January 1, 1930 ..... 1
Sodium salts of organic acids, The utilization of nitrogenous organic compounds and, by certain soil algae in darkness and in the light ..... 161
Soil algae, The utilization of nitrogenous organic compounds and sodium salts of organic acids by certain, in darkness and in the light ..... 161
Some agglutination studies with meningococci. Abstract ..... 32
—— characteristics of bacteria causing mustiness in eggs. Abstract ..... 55
—— fermentation characteristics of various strains of *Rhizobium meliloti* and *Rhizobium japonicum*. Abstract ..... 41
Southwick, Mercy A., and Pittman, Margaret. Studies on respiratory diseases. The pathology of pneumococcus infections in mice ..... 363
Special methods in marine bacteriology and preliminary surveys of Pacific waters. Abstract ..... 11
Spitzer, George, and Parfitt, E. H. The bacterial proteolytic enzymes: Their activity at different pH values and the effect of sodium chloride. Abstract ..... 12
Spontaneous, The, culture and silica gel plate methods for studying the nonsymbiotic nitrogen-fixing bacteria in soils. Abstract ..... 39
Spore formation by *Bacillus subtilis* as influenced by pepton concentration. Abstract ..... 11

Spread of mosaic virus in tomato plants. Abstract ..... 23
Stearn, Allen E. Compound formation of crystal violet with nucleic acid and gelatin and its significance in dye bacteriostasis ..... 133
Stoland, O. O., and Sherwood, Noble P. Further studies on canine anaphylaxis. Abstract ..... 28
Streptococci, Advances in the study of ..... 57
—— in the lesions of experimental poliomyelitis in monkeys. Abstract ..... 27
—— in the spinal fluid of experimental poliomyelitis in monkeys. Abstract .. 27
Stuart, L. S., and James L. H. Studies in microbial thermogenesis. III. The effect of salting on the microbial heating of alfalfa hay. Abstract ... 53
Studies in microbial thermogenesis. III. The effect of salting on the microbial heating of alfalfa hay. Abstract ..... 53
—— of bacterial population during sludge digestion ..... 269
—— on aphid transmission of plant viruses. Abstract ..... 21
—— on fungi of the genera candida, cryptococcus and mycoderma isolated from the skin of an epidemic perleche. Abstract ..... 31
—— on respiratory diseases. Some relations between extracts, filtrates and virulence of pneumococci ..... 327
—— on respiratory diseases. The pathology of pneumococcus infections in mice ..... 363
—— on the nature of bacteriophage. Abstract ..... 19
—— on the precipitin reaction. II. The composition of the precipitate and some factors influencing its formation. Abstract ..... 37
—— on thermophiles in milk. Abstract ..... 47
Study, A, of methods for the estimation of reducing sugar in bacteriological media ..... 125
—— ——, of pin-spot molding on shell eggs in cold storage. Abstract ..... 55
—— ——, of *Rhizobium japonicum* isolated from various soils. Abstract ... 39
Sugar, A study of methods for the estimation of reducing, in bacteriological media ..... 125
—— -tolerant, A, member of the colon-aerogenes group ..... 145
Sugars, The inhibition of *Phytomonas malvacearum* in culture media containing ..... 423
Sullivan, J. W., Walker, R. H., and Pohlman, G. G. The spontaneous culture and silica gel plate methods for studying the non-symbiotic nitrogen-fixing bacteria in soils. Abstract ..... 39
Swenson, T. L., and James, L. H. A study of pin-spot molding on shell eggs in cold storage. Abstract ..... 55

Tetrault, P. A. The growth of thermophilic cellulose decomposing organisms on agar. Abstract ..... 15
Thompson, Isabel, Hastings, E. G., and Beach, B. A. The sensitization of cattle to tuberculin by non-tubercle, acid-fast bacilli of bovine origin. Abstract ..... 29
——, Luther, and Larson, Nora. Potato extract broth for the typing of *Diplococcus pneumoniae*. Abstract ..... 33
Thorwaldson, M. L., and Mudge, C. S. Studies on thermophiles in milk. Abstract ..... 47

Tilley, Frank W., and Chapin, Robert M. Germicidal efficiency of chlorine and the N-chloro derivatives of ammonia, methylamine and glycine against anthrax spores ..... 295
Tittsler, Ralph P. The reduction of nitrates to nitrites by *Salmonella pullorum* and *Salmonella gallinarum* ..... 261
Toxicity, The, and germicidal activity of bacteriophage and of chemical disinfectants as compared by an in vivo test. Abstract ..... 22

Use, The, of certain streptococci as starters for Swiss cheese. Abstract ..... 50
Utilization, The, of nitrogenous organic compounds and sodium salts of organic acids by certain soil algae in darkness and in the light ..... 161

Valley, George, and Casman, E. P. On the serological diagnosis of pullorum disease in domestic fowls: The chemical nature and the mechanism of the "cloudy" reaction. Abstract ..... 36
Variations in *Streptococcus lactis*. Abstract ..... 48

Walker, Harold H. An aeration train for the study of gases produced in bacterial growth. Abstract ..... 6
Walker, John E. The toxicity and germicidal activity of bacteriophage and of chemical disinfectants as compared by an in vivo test. Abstract ... 22
Walker, R. H., and Brown, P. E. Some fermentation characteristics of various strains of *Rhizobium meliloti* and *Rhizobium japonicum*. Abstract ..... 41
——, Sullivan, J. W. and Pohlman, G. G. The spontaneous culture and silica gel plate methods for studying the non-symbiotic nitrogen-fixing bacteria in soils. Abstract ..... 39
Water, On certain factors influencing the survival of bacteria in, and in saline solutions ..... 303
Watson, P. D., Frazier, W. C., Burkey, L. A., and Matheson, K. J. The use of certain streptococci as starters for Swiss cheese. Abstract ..... 50
Weiss, Emil. Antigenic studies of the precipitation test for syphilis. Abstract ..... 34
Werkman, C. H., Hixon, R. M., Breden, C. R., and Fulmer, E. I. The chemical action of *Aerobacter faeni* on xylose and on sucrose. Abstract ..... 41
——, ——, and Patrick, Roger. Evidence of xylanase production by an actionomycee. Abstract ..... 16
——, ——, and Rayburn, C. H. An apparatus for increasing the amount of inoculum without diluting the medium. Abstract ..... 7
—— and Kendall, Sara E. Physiology and classification of the propionic acid bacteria. Abstract ..... 17
Westall, Lucy, Kahn, R. L., and Malloy, A. M. Precipitation studies with spinal fluid. Abstract ..... 35
Williams, O. B. Spore formation by *Bacillus subtilis* as influenced by pepton concentration. Abstract ..... 11
Wilson, P. W., and Fred, E. B. The relationship between the carbon and nitrogen metabolism of the butyl alcohol forming organism. Abstract. 17
——, Peterson, W. H., and Fred, E. B. The relationship between the nitrogen and carbon metabolism of *Clostridium acetobutylicum* ..... 231

Winslow, C.-E. A., and Haywood, Eloise, T. A comparative study of the effect of cations on bacterial viability. Abstract..... 8
Wright, William H., Sarles, W. B., and Holst, E. G. A study of *Rhizobium japonicum* isolated from various soils. Abstract..... 39

Yale, M. W. The control of thermophilic bacteria in pasteurizing plants. Abstract..... 46
